

Press release

Mitsubishi HiTec Paper to increase prices for whole product range

Bielefeld & Flensburg - March 15, 2010 - Mitsubishi HiTec Paper will increase prices world-wide for the whole product range (thermal papers, carbonless papers, inkjet papers) by minimum 10%, according to region and product group. The price adaption is valid for shipments from May 1st, 2010 onwards.

With this inevitable price increase the producer of high quality communication paper reacts to the ongoing strong rise of raw material costs – especially to the extreme pulp costs hikes and the reduction in supply of this important raw material on the global market.
