

thermoscript

Applications:

- > POS
- > Handhelds
- > All kinds of receipts
- > Kiosk systems
- > Couponing, etc.

Slim and efficient

Save time and money – with slimline POS thermal paper from Mitsubishi HiTec Paper.

Time is money. And efficiency is an important success factor, especially in the retail trade and wherever rapid response times and smooth-running processes are a must. With *thermoscript* F 5041 (48g), Mitsubishi HiTec Paper has developed a thermal paper that increases efficiency at the point of sale. It is also kind to the environment, while offering outstanding performance.

The lighter, and therefore thinner base paper means that a roll with the same diameter can be around 15 percent longer. Fewer cores are needed when the rolls are converted, while reduced transport and storage requirements translate into cost savings and less impact on the environment. Fewer roll

changes at the point of sale mean lower staffing and servicing costs – and therefore greater efficiency.

Benefits of a lighter thermal paper:

- > more paper per roll (around 15 percent longer for the same roll diameter)
- > fewer roll changes
- > lower staffing and servicing costs
- > lower transport and storage costs
- > reduced core consumption
- > greater efficiency

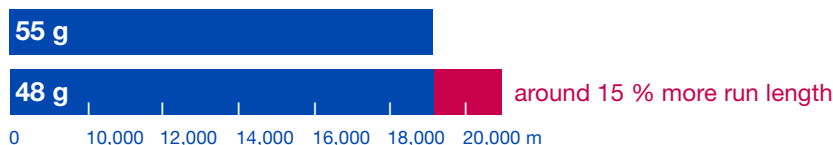

***thermoscript* offers**

- > excellent printing results
- > immaculate print head behaviour (no fouling of the print head)
- > outstanding suitability for high-speed printers

Long-lasting and economical

The 48g version of our F 5041 grade will give you 15 percent more run

length for the same diameter – and the same product performance.

What is more:

Thanks to the modular system used for our thermal papers, other *thermoscript* grades are also available in lighter weights. Have a word with us!

thermoscript

Accredited

The new *thermoscript* F 5041 (48g) helps safeguard the environment. As a responsible manufacturer of speciality paper, Mitsubishi HiTec Paper has been committed to ecosensitive production and processing of thermal paper for many years.

- > FSC certified (Chain of Custody)
- > Nordic Swan certified
- > Reach compliant
- > ISO 14001 certified

As a full-range supplier of thermal papers, Mitsubishi HiTec Paper offers modularised products. With production facilities in Germany and Japan and a global sales network, Mitsubishi HiTec Paper is a strong partner when it comes to individual product solutions.

By buying products with the FSC label you are supporting the growth of responsible forest management worldwide
