

Press Release

Mitsubishi HiTec Paper welcomes 25 new apprentices

Bielefeld – August 30, 2018

On August 1st 2018, twenty-five new trainees launched their professional career at Mitsubishi HiTec Paper's mills in Bielefeld and Flensburg. Among them are eleven paper technologists, six machine and plant operators, two industrial clerks, three industrial mechanics, two electronics technicians and one electronic for automation technology.

An exciting time awaits the new apprentices (15 at the Bielefeld plant and 10 at the Flensburg plant) with many new experiences over the next few years: whether it will be on the large paper machines, the ultra-modern coating machines or in the management and distribution of the globally acting manufacturer of coated specialty papers.

For Mitsubishi HiTec Paper, the training of young people has always been a high priority. "Competitive production and worldwide sales of our high-quality specialty papers is only possible with well-trained specialists" says Andreas Born, Head of Training in Bielefeld. "And we are pleased to provide this training in-house!"

Our new apprentices at the Bielefeld mill

Our new apprentices at the Flensburg mill

Mitsubishi HiTec Paper Europe GmbH is a German subsidiary of Mitsubishi Paper Mills Ltd., Japan, one of the world's leading manufacturers of specialty paper. The roughly 700 employees at Mitsubishi HiTec Paper Europe produce high-quality direct thermal, digital imaging, carbonless, label and barrier papers at two tradition-rich locations in Bielefeld and Flensburg.

Each factory stands out for own base paper production, state-of-the-art production machinery and innovative coating technologies. Through its dense global sales network, Mitsubishi HiTec Paper Europe supplies a full range of specialty papers featuring a modular system for every application and printing technology – and is a highly capable partner whenever customized coated paper solutions are required.
