

Press Release

Successful FSC® and PEFC™ monitoring audit

Bielefeld – July 15, 2020

Mitsubishi HiTec Paper has successfully passed without exception the monitoring audit and the re-certification of FSC® Chain-of-Custody and PEFC™ Chain-of-Custody.

Mitsubishi HiTec Paper attaches great importance to the environmentally conscious and sustainable production of its coated specialty papers. This has now been reaffirmed by the successful FSC® monitoring audit and the PEFC™ re-certification of the mills in Bielefeld and Flensburg. Both locations continue to carry the FSC® Chain-of-Custody and PEFC™ Chain-of-Custody certifications, and all coated specialty papers produced in Bielefeld and Flensburg are still available FSC® Mix or PEFC™ certified.

“The world is facing major climatic and social challenges. It is therefore all the more important for us to ensure that the raw materials we use and our products meet the highest standards in terms of sustainability and social responsibility,” says Nic Holmer, Director Sales & Marketing at Mitsubishi HiTec Paper. “When it comes to sustainability, our BARRICOTE® barrier papers for flexible food packaging are particularly relevant: as a replacement for plastic packaging, they are completely recyclable and thus protect not only food and consumers, but also the environment.”

Mitsubishi HiTec Paper Europe GmbH is a German subsidiary of Mitsubishi Paper Mills Ltd., Japan, one of the world's leading manufacturers of specialty paper. The roughly 750 employees at Mitsubishi HiTec Paper Europe produce high-quality direct thermal, inkjet, carbonless, label and barrier papers at two tradition-rich locations in Bielefeld and Flensburg.

Each factory stands out for own base paper production, state-of-the-art production machinery and innovative coating technologies. Through its dense global sales network, Mitsubishi HiTec Paper Europe supplies a full range of specialty papers for many applications and printing technologies – and is a highly capable partner whenever customized coated paper solutions are required.
