

## Press Release

# Jetscript GS 1062 - new inkjet paper for sophisticated, personalized labels

Bielefeld – November 11, 2021

*With jetscript® GS 1062, the German specialty paper manufacturer Mitsubishi HiTec Paper is now offering a new coated premium inkjet paper as face-stock material for sophisticated, personalized label applications.*

The 95g paper impresses with a particularly homogeneous semi-glossy surface and a high visual gloss. The special coated ink receiving layer not only enables excellent colour reproduction and very good colour brilliance, but also high colour density even with dark shades. Printouts in photorealistic print quality are easily possible with GS 1062.

Jetscript GS 1062 can be printed with all common dye and pigment inks and is suitable for HP Indigo. The reverse side is perfectly matched to a self-adhesive finish. The brand-new inkjet paper is available FSC® Mix or PEFC™ certified, of course. This makes GS 1062 the perfect inkjet paper for sophisticated, personalized labels in the areas of logistics, packaging, food & non-food, beverages, promotion, etc.

### Jetscript GS 1062 - new inkjet paper for sophisticated, personalized labels

Mitsubishi HiTec Paper Europe GmbH is a German subsidiary of Mitsubishi Paper Mills Ltd., Japan, one of the world's leading manufacturers of specialty paper. The roughly 770 employees at Mitsubishi HiTec Paper Europe produce high-quality direct thermal, inkjet, carbonless, label and barrier papers for flexible packaging at two tradition-rich locations in Bielefeld and Flensburg. Each factory stands out for own base paper production, state-of-the-art production machinery and innovative coating technologies. Through its dense global sales network, Mitsubishi HiTec Paper Europe supplies a full range of specialty papers for many applications and printing technologies – and is a highly capable partner whenever customized coated paper solutions are required
