## Domino at Drupa 2016

Digital Printing Solutions, a division within Domino Printing Sciences founded in 1978, has established a global reputation for the development and manufacture of digital ink jet printing technologies

Domino will be on Stand No 5A23 at Drupa 2016. Philip Easton, Director of Domino's Digital Printing Solutions Division said, "We will continue to focus on delivering solutions to meet different customer requirements rather than just offering the digital printing press. This is the best way to provide our customers with real added value - our latest innovations start with job creation and workflow, through to printing and final product finishing. I am delighted to be working with both the IBIS and Kern teams at Drupa. This will be Domino's first of two planned product offerings for the book printing market."

Bryan Palphreyman, Domino Product Manager said, "We continue to show how ink jet can innovate and add value. In addition to our screen-like white printing, we will be demonstrating unparalleled levels of creativity including our latest 'Textures by Domino' print solution showing the digital creation of three dimensional textured images."

## Bobst leading innovation

BOBST, the world's foremost supplier of equipment and services to packaging and label manufacturers, in the folding carton, corrugated board and flexible materials industries will use drupa 2016 to showcase innovation solutions that will drive customer productivity higher, open up new capabilities and protect customers' global investments .

Jean-Pascal Bobst, CEO of BOBST, said, "2016 will be a milestone year for BOBST as we celebrate the 125th anniversary of the formation of our company. This drupa will see us clearly demonstrate that we are going forward with the same dynamism and commitment that first won us our reputation in the industry".

Visitors who pre-register online to visit the BOBST booth at drupa 2016 will get a BOBST Innovation Compass sent to their Smartphone which will give them quick and easy guided access to those solutions on the booth they have expressed an interest in.

## IST METZ displaying UV products at drupa

High-performance UV LED systems are a focus of the trade fair appearance. At drupa UV systems manufacturer IST METZ will be displaying both UV lamp and UV LED systems on show Stand B10 in Hall 2, and it will also be possible to see them in action. They will be showing the practical application of its systems on a printing press on its stand, demonstrating the use of UV lamp systems for printing packaging and UV LED systems for commercial printing on a Heidelberg Speedmaster XL75-6+L (UV-Anicolor). The machine will run four times a day and make a printed product developed especially for the trade fair to highlight the benefits of the technology.
